PROFESSIONAL SUMMARY

Information Systems graduate from Universitas Gunadarma (GPA 3.86/4.00) seeking a Quality Assurance Engineer role. Hands-on experience in manual functional testing, positive and negative test case design, API testing with Postman, and defect reporting, gained through an internship at PT Kimia Farma Apotek (POS integration with GrabMart) and academic web projects. Detail-oriented and analytical, with strong documentation skills and experience validating features against business requirements.

EDUCATION

Universitas Gunadarma 2022 – 2026
Bachelor of Computer Science in Information Systems |GPA: 3.86/4.00

- Ranked Global Top 50 in the Google Solution Challenge 2025.
- Served as a Public Relations Volunteer at FIKTI Career.

PROFESSIONAL EXPERIENCE

PT Kimia Farma Apotek Jul 2025 – Dec 2025
Digital Channel Intern

- Developed a web-based POS integrated with GrabMart via REST API and webhooks (React, Node.js/Express, PostgreSQL), and tested 9 key endpoints in Postman covering login, branches, products, inventory, order webhook, order status updates, and menu retrieval.
- Simulated GrabMart order webhooks in Postman to verify order intake, database storage, and dashboard display; documented that status updates to the Grab API return "order not found" for simulated orders.
- Reviewed published sentiment studies of Kimia Farma Mobile to identify recurring user complaints for UI/UX improvement.
- Interviewed pharmacists at 7 Kimia Farma outlets (Oct 2025) about customer complaints on Kimia Farma Mobile and documented recurring issues: refund flow, voucher restrictions, unclear discounts, slow registration, online–offline price mismatch, and payment problems.
- Coordinated a Kimia Farma Mobile download and feedback drive with 100+ head-office staff, collecting app reviews and documenting each participant's submission.

Universitas Gunadarma Sep 2024 – Jul 2026
Data Science Teaching Assistant (DGX)

- Developed and tested 3 machine learning projects using Python and DGX computing resources.
- Performed testing, debugging, and validation to identify implementation issues and evaluate results.
- Assisted students in troubleshooting programming and technical issues during practical sessions.
- Contributed to research and discussions on algorithms, data science, and machine learning.

PROJECT EXPERIENCE

SplitYuk: Bill Splitting Web Application Sep 2025 – Jan 2026
Frontend Developer & Quality Assurence Engineer

- Designed and executed 22 positive and negative test cases across authentication, profile, group management, tax and service charge calculation, payment status, notifications, and history; 19 passed and 3 failed (86.4%). QA documentation.
- Logged 2 major defects with steps to reproduce, severity, and priority: required profile fields (bank account/e-wallet) could be saved empty, and the "me" label was shown to the wrong user on the Member Status page.
- Built the responsive, mobile-friendly Progressive Web App frontend with React, Vite, and JavaScript.

Kitabisa Donation Platform: Black Box Testing 2026

Tester, Group Course Project

- Executed black-box tests on Kitabisa (web and mobile) using equivalence partitioning and boundary value analysis, covering login, fundraiser creation, donation amount limits, payment, zakat calculator, and identity verification.
- Identified and documented 2 defects: OTP via WhatsApp failed for invalid phone numbers (missing input validation), and KTP was listed as a requirement but not requested in the registration form.

JurusanKu Feb 2025 – Jul 2025

Fullstack Developer

- Developed a web application that helps high-school students explore suitable university majors through questionnaire-based assessment and MBTI testing.
- Tested application flows from questionnaire input to assessment results to validate expected functionality and user experience.
- Executed scenario-based testing during development to identify issues and ensure features worked as expected.

TRAINING & CERTIFICATIONS

BNSP – Data Analyst |2026

Analyzed poverty-related data using the CRISP-DM methodology to identify patterns and generate data-driven insights.

Coding Camp by DICODING DBS Foundation – Fullstack Developer | 2025

Credential URL: https://bit.ly/DicodingDBS2025

- Selected from 60,000+ applicants nationwide for an intensive Full-Stack Web Development program covering programming, Git/GitHub, front-end, and back-end development.
- Developed a machine learning-powered major recommendation web application as a capstone project, achieving a 94/100 final score.

Kominfo & Alibaba Cloud – Cloud Computing | 2024

Credential URL:https://bit.ly/AlibabaCloud2025

- Completed an intensive Cloud Computing program covering cloud infrastructure, networking, and Alibaba Cloud (ECS, OSS, RDS), achieving a 91.7/100 score.
- Earned a cloud-based capstone project with an 82.8/100 score and earned the Alibaba Cloud Certified Associate (ACA) certification.

SKILLS

Quality Assurance: Manual Testing, Functional Testing, Test Scenario & Test Case Design, API Testing, Requirement Validation, Input Validation Testing, User Feedback Analysis, Bug Reporting & Documentation.

Technical: REST API, Webhooks, Node.js (Express), SQL (MySQL, PostgreSQL), Python, JavaScript, TypeScript, React.

Tools: Postman, Git, GitHub, Figma, Streamlit, Vercel.

Soft Skills: Analytical Thinking, Problem Solving, Attention to Detail, Communication, Presentation Skills, Teamwork.
